SUMMARY

Full-Stack Developer with **1 year of production experience** building end-to-end web applications using **React.js**, **TypeScript**, **Node.js**, and **Python**. Strong problem-solver with a track record of diagnosing real production issues – from WebSocket instability to payment flow failures – and shipping creative, scalable solutions. Experienced with **AWS**, real-time systems, and **AI-assisted development workflows**.

EXPERIENCE

IvyLead

May 2025 – Present

Software Development Engineer-1

Remote

- Diagnosed WebSocket file-upload failures caused by oversized payloads – designed a **2-pass image compression pipeline** using the **Canvas API** (1920×1080 @ 0.8 quality, fallback to 1280×720 @ 0.6), reducing payload size by up to **65%**; also optimized component structure and rendering flows to improve UI responsiveness and ensure a consistent experience across all device sizes.
- Identified redundant API calls firing on every route change across **20+ data domains** – architected a **timestamp-based cache invalidation** strategy (subscriptions, orders, prescriptions, transactions), cutting unnecessary network requests by **~35%** without sacrificing data freshness.
- Unified **4 payment methods** (Stripe card, Apple Pay, Google Pay, Klarna) into a single checkout component with runtime eligibility detection, dynamic method toggling, and per-provider failure recovery – reducing payment drop-offs with seamless fallback UX across all device types.
- Resolved silent chat disconnections in production by implementing **Socket.IO** auto-reconnect with 5-attempt exponential backoff (1s to 5s delay) and pending message queuing – reducing user-reported drop-offs by an estimated **75%**; backend services written in **TypeScript + Node.js** with strict interface contracts.
- Automated order processing and shipment tracking workflows using **Python scripts** deployed to **AWS S3** – parsing tracking numbers, updating fulfillment status on order placement events, and eliminating **3–4 hours/week** of manual operations work.

PROJECTS

StudyNotion – Learning Management System | *React.js, Redux, TailwindCSS* | *Node.js, Express.js, MongoDB, JWT*

- **Frontend:** Built a **React.js** LMS with role-aware routing (student vs. instructor), Chart.js analytics dashboards, and JWT-protected purchase flows – validated by **200+ users** in a national hackathon.
- **Backend:** Designed **Node.js/Express** REST APIs with **Razorpay** payment integration and **Cloudinary** media pipeline, cutting video load time by **25%**.

StreamForge – Video Platform | *React.js* | *Node.js, TypeScript, Express.js, MongoDB, MySQL, JWT*

- **Backend:** Engineered a **TypeScript + Node.js** REST API for a YouTube-style platform – JWT refresh token auth, RBAC, and **MongoDB** aggregation pipelines for channel analytics and trending content.
- **Frontend:** Built the **React.js** consumer layer with dynamic video feeds, protected routing, and **MySQL**-backed analytics rendering.

Sanatan Seva – CMS & Booking Platform | *React.js, TailwindCSS* | *Node.js, TypeScript, MongoDB, JWT, Cloudinary*

- **Full-Stack:** Built end-to-end – **React.js** frontend with admin analytics dashboard and **TypeScript/Node.js** backend handling **500+ daily bookings** and a Kundli system for **1K+ users**.
- **Integrations:** Wired **Razorpay** payments, **Cloudinary** media uploads, and **Mailtrap** transactional email – boosting content upload throughput by **20%**.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Python, SQL

Frontend: React.js, Redux, TailwindCSS, HTML5, CSS3, Axios, Socket.IO, Figma

Backend: Node.js, Express.js, TypeScript, REST APIs, WebSockets

Databases: MongoDB, MySQL, Redis

AI Dev Tools: GitHub Copilot, Claude (Anthropic), ChatGPT, Cursor AI

Infra / Tools: AWS (S3), Docker, Git, GitHub, Postman, JWT, Cloudinary, Razorpay

EDUCATION

Motilal Nehru National Institute of Technology, Allahabad

2025

B.Tech, Computer Science and Engineering

Prayagraj

ACHIEVEMENTS

- Ranked **216 globally** in LeetCode Weekly Contest among **30,000+ participants** – top **0.7%** worldwide.
- Secured **2nd place** at **Hack36 9.0** – MNNIT's flagship **36-hour national hackathon** with **300+ competing teams**.
- Qualified **JEE Advanced** (AIR-9123) and **JEE Mains** (AIR-2661) – top **0.07%** of 1.3 million aspirants nationwide.
